

Readme for replicating results in “Genetic Endowments, Educational Outcomes, and the Moderating Influence of School Quality”, by Benjamin W. Arold, Paul Hufe, and Marc Stoeckli.

If experiencing trouble running the code or replicating results, contact Paul Hufe (paul.hufe@bristol.ac.uk).

Overview

This replication package generates all tables, and figures of the paper “Genetic Endowments, Educational Outcomes, and the Moderating Influence of School Quality.”

- All raw data shall be stored in folder “rawdata.”

- All script files shall be stored in the folder “scripts.”

- All (user-written) packages for statistical programs shall be installed in the folders “scripts/libraries/python,” “scripts/ libraries/R,” “scripts/ libraries/stata.”

Raw data is not shared as part of the replication package. However, download and storage instructions are provided below.

Some analyses will require the installation of additional user-written packages that may experience version updates over time (see above). Contact Paul Hufe (paul.hufe@bristol.ac.uk) for more information which versions of user-written packages were used for the analyses. We are happy to share the folder “scripts/libraries” used for our analyses with replicators upon request.

Description of programs/code

Software requirements.

All analyses were run on Windows 11 using Stata version 18, R version 4.4.3, Python 3.8.19 called through Windows PowerShell ISE (x86).

Runtime.

Approximate time needed to reproduce the analyses on a standard desktop machine (PC (64-bit x86-64), Intel(R) Core(TM) i7-8700 CPU @ 3.20GHz, 16GB RAM): 11 hours.

Most of the calculation time (>10h) is due to the simulations for Appendix C.

Instructions for Replicators.

1. Open replication directory and store folders "scripts" and "rawdata" as described above.
2. Open "scripts/_master.do" and set relevant paths.
3. Install (user-written) packages for statistical programs into the folders "scripts/libraries/python," "scripts/ libraries/R," "scripts/ libraries/stata."
4. Execute script-files following the sequence indicated in "scripts/_master.do."
